SUNGARD®

GLOBAL SERVICES
Business & technology consulting and managed services

ACCELERATE INNOVATION THROUGH ADVANCED TECHNOLOGY

Semantic web, enterprise social applications, natural user experience, mobile applications - exciting developments such as these are redefining how businesses use information technology from the back office to the customer interface. IT continues to grow in power and importance for every business as the pace of technology change continues to accelerate and the need for data mining is taken to a new level to support ever-growing regulatory changes. SunGard Global Services develops knowledge and experience with advanced technologies through our own research and development efforts as well as customer engagements.

Advanced technology services

Our consultants combine industry knowledge and technical understanding to help companies develop applications, integrate systems and manage information. We use the latest technologies and development techniques to create solutions for companies in media and other industries on the cutting edge of IT. We then extend our experience and innovations to our financial services and energy customers.

- Technology selection
- Prototype development
- Full system development
- Agile/SCRUM/XP development mentoring
- Development process re-engineering
- Development of reusable tools and frameworks
- Web development: REST, HTML5, AJAX
- Mashup/composite applications
- Semantic Web
- Cloud computing (IaaS/PaaS/SaaS)
- Mobile applications
- Data grids
- Enterprise social networks
- Big Data & NoSQL
- Hardware acceleration
- Complex events processing

What we offer

SunGard Global Services can help you capitalize on emerging or advanced technologies to seize new business opportunities and optimize your existing processes. Our experienced consultants apply their deep hands on technology knowledge and their broad understanding of financial services, energy and other specialized industries to help you develop applications, integrate systems and manage information to improve competitiveness and efficiency. Our professionals are skilled in leading technologies including:

- Java: Grails, Clojure, Scala
- .NET: Geneva, F#, LINQ
- RIA: Flex, WPF & Silverlight
- Mobile (iOS)
- Mashup/composite applications
- Big Data/NoSQL/MapReduce)
- SaaS/Cloud Computing: EC2, Azure, Infinity
- Data Grids: Coherence, Terracotta, AppFabric

We work with your development and business teams to analyze, profile and improve current processes.

- We use a variety of Agile project management and execution techniques to facilitate quick delivery and reduce risk

We are independent in the selection of tools and products.

- We can also provide global delivery capabilities, a full range of support including application and infrastructure management, as well as hosting and disaster recovery
