Bank am Bellevue AG Implements SunGard for Integrated Trading and Settlement SunGard's Ambit Apsys and Front Arena Solutions Chosen to Provide Front-to-Back STP for Trading and Execution

Geneva, 11 February 2008 – SunGard (<http://www.sungard.com>) today announced that Bank am Bellevue AG, a specialized institutional broker and investment bank based in Zurich, has implemented an integrated offering from SunGard to provide it with a fully-automated, straight-through processing solution for its buy-side and sell-side operations. SunGard's Ambit Apsys core banking system, which includes portfolio management, clearing and settlement functionality, has been integrated with SunGard's Front Arena order management and front-end trading system. The solution will link exchanges, clients and other participants along the bank's value chain.

Bank am Bellevue required a real-time solution that would help to enhance the quality and speed of its trade execution in the face of steadily increasing trade volumes, and provide the capabilities and time to market needed to effectively trade on foreign stock markets. The bank also needed to reduce risk on a daily basis, meet rising client expectations for service and view its operations holistically - from trading and execution through to confirmation, clearing and settlement.

Ernst Bollhalder, chief operating officer at Bank am Bellevue, said, "SunGard has given us a powerful front-to-back office solution that has helped us to improve and refine our daily business processes. It has also helped to enhance stability in a time-sensitive business that is consistently reliant on operational efficiency for success. We can now achieve a higher level of service through expert trading and execution, direct access to markets and the ability to handle large transaction volumes and settle trades in real-time. Realising a holistic view of information on current positions, traded prices and other necessary details has also helped us to more effectively assess risk at any moment."

Implemented within a six-month timeframe, the SunGard solution included a FIX trading connection, delivered to meet increasing demand from the bank's clients to trade via FIX.

Mr. Bollhalder continued: "SunGard's FIX connection allows clients to see the connection directly with their brokers and be informed immediately after trade executions. This is one example of SunGard's expertise, professionalism and attention to our needs. SunGard identified our specific requirements within a short time, and organised visits with other Ambit Apsys bank customers so that we could benefit from their knowledge, which resulted in a smooth and timely implementation."

Werner Kriech, branch manager at SunGard's Ambit Apsys Zurich office, commented: "SunGard's Ambit Apsys has the scalability needed to help support Bank am Bellevue's increasing trade volumes and client services demands. We are pleased that our work with the bank has illustrated SunGard's ability, with the

integration of Ambit Apsys and Front Arena, to deliver a front-to-back STP solution that helps firms accelerate time to market, execution and settlement while improving business processes and operational efficiency.”

About Bank am Bellevue AG

Bank am Bellevue, founded in 1993 is a subsidiary of Bellevue Group, which is an independent financial group listed on the SWX Swiss Exchange that specializes in investment banking and asset management. In particular, it's business operations encompass asset management and consulting for both private and institutional clients as well as the investment banking and corporate finance business, with the emphasis on Swiss equities.

About Ambit Apsys

Ambit Apsys is a comprehensive solution designed for banks and financial institutions primarily active in private banking and wealth management, focusing on the needs of their private or institutional clients with global and holistic service. Serving institutions from 10 to 500 and more users, Ambit Apsys offers high performance, scalability, and advanced business process and front-office functionality while maintaining low total cost of ownership. Ambit Apsys is a real-time, multi-lingual, multi-currency and multi-entity, front-to-back integrated solution operating on an open and state of the art technical environment.
