SunGard Tops Risk Magazine's Rankings for Credit Risk for Fourth Consecutive Year

Wayne, PA - December 20, 2011 - SunGard has been named the top vendor for enterprise-wide **credit risk** management in *Risk magazine's* annual Risk Technology Rankings. This is the fourth consecutive year that SunGard has topped the credit risk management category. SunGard placed second overall in the enterprise-wide risk management section, as well as second in the **liquidity risk** management, risk aggregation, economic capital calculation, and asset and liability management sub-categories.

Risk, a leading financial risk management publication, established its annual technology rankings in 2004 to recognize best practice and innovation in the risk management industry by software vendors. Each year, users of risk management technology services are asked to name leading vendors in several categories based on functionality, usability, performance, return on investment and reliability. This year *Risk* polled thousands of banks, hedge funds, pension funds and insurance companies and received more than 800 valid responses.

SunGard's risk solutions include Adaptiv, an enterprise-wide credit and market risk management and operations solution suite. Adaptiv Credit Risk helps firms measure, manage and control their counterparty credit exposure in real-time across the enterprise. SunGard's Ambit solution suite for risk and performance helps banks gain a centralized view of risk, liquidity, capital and profitability across the enterprise for improved decision making and regulatory compliance.

Harold Finders, chief executive officer for SunGard Financial Systems, said, "The need for banks and other financial institutions to create an effective risk culture across the organization is greater than ever.

SunGard's range of risk solutions helps customers throughout the finance industry comply with regulations and make better business decisions by achieving improved visibility and understanding of risks across the enterprise."

About SunGard's Adaptiv

SunGard's Adaptiv provides enterprise-wide credit and market risk management and operations solutions for financial services institutions. Adaptiv assists institutions of varying size and complexity to deploy technology to meet both internal and regulatory requirements for risk management and operational control. Adaptiv helps financial services institutions from the banking, hedge fund, asset management, insurance and corporate sectors with its deep understanding of risk management and operational processes.
