Course Schedule

Introduction

This two-day course provides delegates with the comprehensive overview of the European energy market structure, history of its development and commodities that are traded over-the-counter and on exchanges. Besides gaining invaluable exposure to terminology, the description of market participants and their roles in trading, each delegate will learn the value energy chain from exploration to speculation and brokerage, the price development concept, risk analysis and the fundamentals of energy trading. Course includes team exercises and role plays to reinforce the understanding of the topics presented. This course is designed for people who will be working with SunGard ETRM system - ZaiNet.

Who should take the course

The course is designed for people from the support staff to management – anyone who needs to learn the basics of the European Energy market or sharpen their skills on terminology and trading prior.

Course Cost

£ 1900 per person (discount for any additional person - £1600)

Includes 2 full day of hands-on training

Training guide with practice exercises

Lunch

Location

London - Canary Wharf
