SunGard Augments Management Team for Data Management Solutions

SunGard's Energy and Commodities business has appointed two senior managers to help evolve its energy data management solution suite and continually meet the growing regulatory, risk, and daily operational and trading needs of energy traders and utilities. The appointments of Leslie Barbagallo as chief operating officer and Dilip Kumar as director of development for Fame Energy data management solutions will help SunGard enhance its focus and investment on meeting customers' energy and commodities data needs.

Leslie Barbagallo is responsible for the Fame Energy solution strategy and customer service, helping meet expanding customer requirements for energy and commodities data management, analytics and storage. Ms. Barbagallo will be responsible for growing the customer-facing team, in line with continued growth in the number of data customers and the breadth of SunGard data solutions these customers are adopting. Her background includes 17 years in energy and commodities, beginning as one of three co-founding partners and a chief operating officer at RLW Analytics, Inc. (now part of KEMA), an analytical and technical consulting firm for the energy and utility industry. Ms. Barbagallo then moved to OpenLink Financial, where she was director of sales and account management for financial firms trading financial and physical commodities. She joined SunGard's Kiodex team in 2005, and most recently led an equities trading solutions team at SunGard that included sales, account management, implementation, support, product management and marketing, while also running SunGard's Assent buy-side business. Ms. Barbagallo has a B.A. in Biology from Harvard and an MBA from the University of Connecticut.

Dilip Kumar is responsible for development and quality assurance for SunGard's Fame Energy and fuel processing components. With more than 15 years of experience in IT, he has also worked in the energy industry for leading producers including Shell, General Electric, Duke Energy, Tenneco, and El Paso Energy, where he architected, designed and developed multi-tier application systems on multiple platforms, and has managed all stages of software development projects. Prior to SunGard, Mr. Kumar was the IT manager at Halliburton, where he managed the company's global cross-functional IT teams.

He is experienced with agile development methodologies and is certified in the IT Infrastructure Library framework (ITILF), the de facto standard international standard framework of best practices in IT Service Management, and as a Project Management Professional (PMP), a Project Management Institution certification that demonstrates advanced knowledge of and experience with project management concepts. Mr. Kumar has a B.S. in Mathematics and an MBA from Pamplin School of Business at Virginia Tech.
