The recent credit crisis and market volatility are driving financial institutions to further mitigate risk, increase performance and anticipate peak volumes. Futures and options market participants therefore require more automation with increased STP levels, better risk control tools and scalable solutions with key performance indicators.

With the most comprehensive suite of software including GL Win, GL Clearvision, GL Ubix, GMI, Stream, as well as a unique trading and clearing gateway coverage worldwide, SunGard can help you win more business while better controlling both risk and costs.
