

ELF (EASY LASER FORMS)

Create and print forms including checks, purchase orders, invoices, personnel forms, and virtually any type of business form using Easy Laser Forms, or ELF. Select from a number of standard forms, or create custom forms by incorporating illustrated designs such as organization seals. ELF is a pure software solution. No hardware requirements, such as a printer board or font cartridge, are necessary.

Features

- Use multiple printers without additional installations.
- Print forms to any local or network accessible printer.
- Split jobs such as large check runs and run off multiple printers at the same time.
- Use signature logic for payroll checks, EFTs, purchase orders, and accounts payable checks.
- Define fonts and signatures.
- Utilize a built-in MICR font and support 3-of-9 barcoding.
- Print multi-sided forms (limited to 120 lines per form).
- Security is embedded in the software through the use of image encryption and password requirements. An audit trail is available through IFAS.
