Ambit Report &
Document Archiving

AMBIT REPORT & DOCUMENT ARCHIVING

LEVERAGE KEY BUSINESS INFORMATION BURIED IN YOUR MASSIVE REPORT ARCHIVES. SUNGARD'S AMBIT REPORT AND DOCUMENT ARCHIVING IS THE NEXT GENERATION IN REPORT MANAGEMENT SOLUTIONS

For years, thousands of users worldwide have depended on Ambit Report & Document Archiving for archiving, viewing and querying their reports. Ambit Report & Document Archiving satisfies the needs of companies who need a web-enabled, departmental or branch solution for report management and analysis while capitalizing on the latest technology.

The Advantages of Ambit Report & Document Archiving

- Makes Finding and Using Information Quick and Easy
- Presents Information in its Full
- Ends the Costly Paper Chase
- Makes Information Available Immediately

Ambit Report & Document Archiving at Work for:

- Customer Service
- Report Consolidation
- Report Distribution
- Statement Consolidation/Rendering
- Regulatory/Statutory Reporting

Ambit Report & Document Archiving goes way beyond Computer Output to Laser Disk (COLD) technology to provide a fully supported, integrated report mining and warehousing solution. Ambit Report & Document Archiving is far more powerful than other COLD systems that only provide storage, retrieval, and viewing of reports. It allows you to select, for analysis, any items of data from existing reports without having to write software or re-key data.

AMBIT REPORT & DOCUMENT ARCHIVING IS A TOTAL REPORT MINING AND ARCHIVAL SOLUTION

Unlock the value of your report information:

- An end-user report mining solution that unlocks information to perform previously impossible analysis.
- Extracts transaction data for analysis by PC applications without reprogramming or re-keying.
- Integrates easily with all Windows-based applications, including Excel and Access.
- Provides a quick, easy way to access archived information that is too costly to maintain on a host system.
- Archives and consolidates reports from different host systems onto a common platform.
- Provides a legal archive repository with optical disk storage that meets regulatory requirements for long-term records retention.
- Pays for itself with bottom-line savings on paper, fiche, staff, and report printing and distribution.
- Improves response in customer service and other time-sensitive environments.
- Improves productivity and efficiency by delivering timely information to frontline staff.

POWERFUL INFORMATION IS LOCKED IN REPORTS

You use reports from your transaction processing systems across your organization to help control key functions:

- Finance,
- Operations,
- R&D,
- Logistics,
- Sales and marketing,
- Manufacturing,
- Customer Service, and many more

But, even though these reports are difficult to manage and use, the information they hold is so powerful that significant resources are devoted to their manual analysis. Your organization may also still output and distribute reports on paper. Or, you may have an old, traditional COLD (Computer Output to Laser Disk) solution which simply indexes and stores reports electronically. Neither one of these approaches allow reports to be intelligently queried to obtain the real answer your management and customers require.

WHAT'S IN AMBIT REPORT & DOCUMENT ARCHIVING?

Easy, Web-enabled Report Access

The web-enabled Ambit Report & Document Archiving provides easier access to reports for remote users, less maintenance overhead, and lower administration costs for the system. Ambit Report & Document Archiving also provides for web overlays, output to text files for browsing

your reports at a later time, style sheets that save a report's printer settings, and the ability to print all query results with one click.

Intuitive, Windows-based User Interface

The new, intuitive, Windows-based user interface has contemporary icons, hot keys, and toolbars. The new 'find report' feature searches for specific report or folder names, eliminating manual searches.

Scalability

Ambit Report & Document Archiving is a 32-bit, scalable application, compliant with Windows 2000 Servers as well as Windows 2000 and Windows XP desktops.

Increased Stability

Ambit Report & Document Archiving has a new, back-end database structure that allows your organization to integrate with an ODBC-compliant database, such as SQL Server or Access. The stable ODBC standardization results in lower maintenance and administration resources, without the limitations seen with Btrieve.

Faster, More Powerful Processing

Ambit Report & Document Archiving provides quicker and more flexible ingestion of spool files, resulting in a faster, more powerful processing engine.

Quick and Easy Implementation

Ambit Report & Document Archiving is easy to implement. An installation package is provided with your license and has an installation guide as well as on-line help. Your existing script and spool files will migrate seamlessly to the ODBC database and Gateway language to ensure your report management process continues effortlessly.

AMBIT REPORT & DOCUMENT ARCHIVING IS EASY TO IMPLEMENT. AN INSTALLATION PACKAGE IS PROVIDED WITH YOUR LICENSE AND HAS AN INSTALLATION GUIDE AS WELL AS ON-LINE HELP. YOUR EXISTING SCRIPT AND SPOOL FILES WILL MIGRATE SEAMLESSLY TO THE ODBC DATABASE AND GATEWAY LANGUAGE TO ENSURE YOUR REPORT MANAGEMENT PROCESS CONTINUES EFFORTLESSLY.

EASY TO USE

Ambit Report & Document Archiving interfaces easily with your present information systems, and requires no changes to implement. Because Ambit Report & Document Archiving provides report warehousing and mining, you save major investments in hardware, software, and development to support those functions. Typically, users have reduced their report volumes by 50% or more. With 15 minutes or less of training, virtually anyone can use Ambit Report & Document Archiving intuitive, Windows-based interface.

Reduced Costs with PDF Support

Ambit Report & Document Archiving can take in, view and "mine" reports that are in PDF which significantly reduces costs as Ambit Report & Document Archiving can be used for multiple report types.

Administrators can pattern, index, catalogue and archive reports from PDF files. Business Users can query, annotate or view reports and documents in their text format.

Saving the costs and implementation of multiple report management solutions. Ambit Report & Document Archiving Web Client Users have the full use of all the Adobe Acrobat Reader functions to print, fax or email their PDF files, allowing for more efficient operations.

Reduce Risk and Improve Usability Benefits with Local Language

Localisation now supports either Japanese or Simplified Chinese on the Web Client, including Online Help. All images (including tabs such as Report Viewer, Query Editor and icons such as Next Occurrence or Previous Occurrence) and text in the Web Client, can all be displayed in one of the supported local languages. Thus benefiting banks with branches in multiple locations and eliminating the limitations of a single language solution.

Improve Usability via Enhanced Text Searches

Additional Web Client functionality allows the User to process reports more quickly. Text Searches are now case insensitive and the Text Search Status window now displays the number of the page currently being searched and the total number found, which means reduced manual intervention by the User.

AMBIT REPORT & DOCUMENT ARCHIVING PLUS DELIVERS A QUICK RETURN ON INVESTMENT

Better decision making with report mining While providing the legal archive of the various financial, operational, or external computer generated reports from an organization's systems, Ambit Report & Document Archiving also gives you the ability to interrogate or 'mine' those reports. This delivers the information and intelligence required to underpin the best decisions when and where they are required.

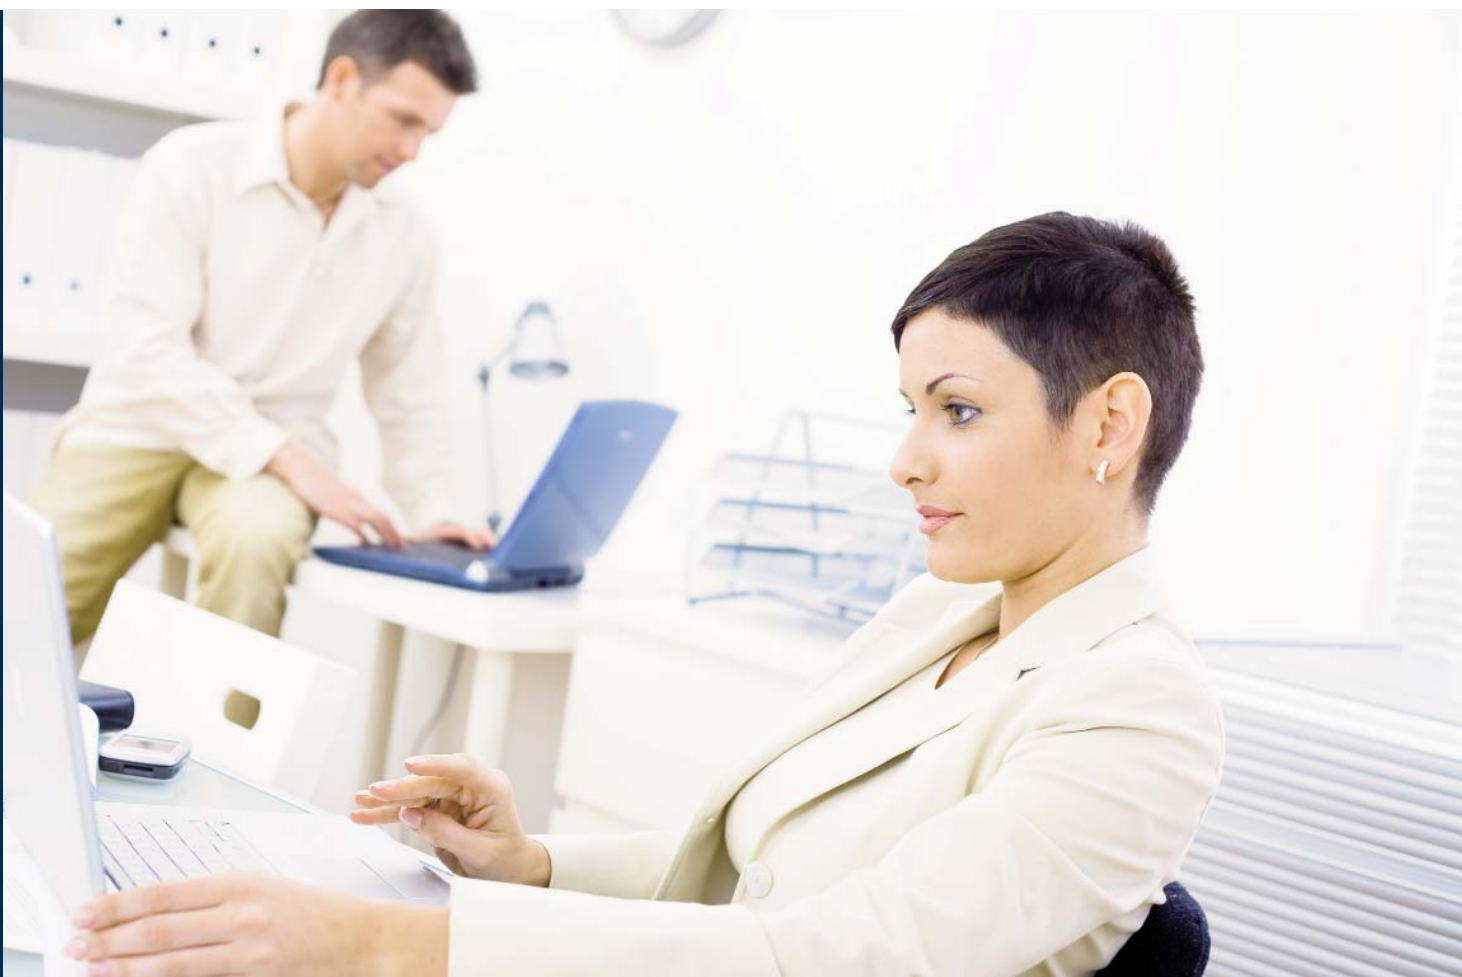

No Significant Modifications to the Host System

Ambit Report & Document Archiving requires no significant modifications to your host systems, instead capitalizing on existing systems investment. It is the users themselves who configure Ambit Report & Document Archiving, relieving hard-pressed IT departments of the unappreciated burden of ad-hoc MIS reporting.

Integration with Desktop Applications for Easy Analysis

Ambit Report & Document Archiving offers tight integration with standard desktop software such as MS Excel or MS Access so that report data can be automatically integrated into, and used by, these applications. This removes the need for you to build custom host download applications, and eliminates the manual effort of re-keying report data into spreadsheets and databases eliminates the manual effort of re-keying report data into spreadsheets and databases- an event that takes place in many parts of most organizations, every day.

THE ADVANTAGES OF AMBIT REPORT & DOCUMENT ARCHIVING

- Makes Finding and Using Information Quick and Easy
- Presents Information in its Full
- Ends the Costly Paper Chase
- Makes Information Available Immediately
