

AVANTGARD PAYNETEXCHANGE - OUTSOURCED PRINT & MAIL

Customers trust SunGard AvantGard to deliver a variety of checks, including checks for payroll, A/P payments, rebates, commissions, refunds, and dividends. Earning this trust has required more than consistently delivering high quality printed documents – it has required a complete solution that keeps customers in control of the entire production process.

Through a Web-based application, customers establish a secure view into AvantGard PayNetExchange to manage their print jobs from start to finish. Using this intuitive application, customers transfer payment files to SunGard AvantGard, review records prior to production, release jobs, check job status, choose delivery options and view reports on all completed jobs.

Customers can reduce printing and postage costs by taking advantage of online presentment of financial documents. Customers can also take advantage of the AvantGard PayNetExchange transaction archive to access PDF images of any documents produced by the system.

Common Check Applications

AvantGard PayNetExchange services provide the optimal solution for any type of check, including the following:

- **A/P Checks** - Eliminate the hassles of producing payments to your vendors, service providers and other trading partners.
- **Payroll Checks** - Relieve the stress of printing payroll checks. Securely process, print and deliver direct deposit advices or present them online.
- **Rebate and Refund Checks** - Manage rebates and refunds efficiently

Key Challenges:

- Lack of Visibility & Control
- Lack of Security
- High Costs

AvantGard PayNetExchange:

3b. Print, Fold, Insert

4. Mail

Check Printing and Delivery Service Capabilities

- **Web-based user interface** - Ensures ease of use, ready access from any location, end user control of job submission, and release to production.
- **Job splitting** - Allows printing and mailing of select items and others to be presented online
- **Job tracking** - Provides visibility over all jobs in process to verify accurate and timely completion.
- **Email notifications** - Emails are generated at job submission and release to carrier.
- **Reporting options** - Provides full process validation and easy analysis of job histories. Data can also be exported in a variety of formats.
- **Data validation** - Review a summary of records to be processed before jobs are released to production.
- **Address cleansing and postal sorting** - Produces the lowest possible postage costs.
- **Portable Document Format (PDF) creation** - Allow authorized personnel to view any document.

Check Printing and Delivery Service Technical Features

- **ASP delivery** - Provides access to a complete, purpose-built system, without sacrificing control.
- **Web-enabled data loading** - Provides a convenient data transfer mechanism while requiring no changes to internal systems.
- **Integration tools** - Created specifically for rapid, custom forms design, data mapping, and project implementation.
- **Branded website** - Provides users a look consistent with their company standards, without requiring a technology investment.
- **Data translation tools** - Enables the mapping of any payment file, circumventing changes to back-end systems.
- **Online presentment** - Present documents online to eliminate paper and associated mailing costs.
- **Data security** - Data is protected from the outset through a secure Internet connection and then encrypted for storage.
- **Administration tools** - Provides control over user access and functions, as well as reporting capabilities.
