

Prophet Enterprise Audit Module

The Prophet Enterprise Audit Module a centralised results production environment for users across an organization. Such a comprehensive view of data offers flexibility in enterprise-wide reporting; however the logging of activities and model run contents requires an external component in order to ensure the auditability of data. The Audit Module is designed to comply with your organization's strictest audit requirements and supports:

- Reproducibility
- Activity logs
- Version Control
- Data checksums
- Full audit trail

Features

- Runtime Logs
- Activity Logging
- Version Control for Models
- Complete data storage for each job completed
- CCE Version Control
- Recreate results from original data, model and calculation engine

Business Benefits

- Runtime logs ensure you can track the details of each job
- Activity logging to support SOX compliance
- Version control stores snapshots of models and their components, which can then be restored
- Versions automatically created as needed or on demand
- All completed jobs can be stored making it easy for user to retrieve data, model, results and logs in the event that a restore is required.
- You can resubmit jobs with the original parameters and engine allowing you to validate results at a particular point in time.
- Finished jobs can be resubmitted to recreate original results or use alternative versions
- Finished jobs contain full audit trail, including model, logs and results

Summary

ERM initiatives require greater control over data in particular the maintenance of data history. For this reason, it is critical that an organisation implements solutions with powerful audit history and logging. The Prophet Enterprise Audit Module guarantees that accurate data history and results are maintained in order to make certain the integrity of each model run.

About SunGard

With annual revenue of \$5 billion, SunGard is a global leader in software and processing solutions for financial services, higher education and the public sector. SunGard also helps information-dependent enterprises of all types to ensure the continuity of their business. SunGard serves more than 25,000 customers in more than 50 countries, including the world's 50 largest financial services companies. Visit SunGard at www.sungard.com.
