

SPONSOR PAYMENTS WEB

Sponsor Payments Web is the Web solution for Omni Payments customers that provides plan sponsors with Internet access to their accounts in real-time. This helps eliminate costly software distribution by establishing a single remote access portal to the Omni Payments solution, used for managing check writing, pension disbursement and tax reporting activities. With Omni's Sponsor Payments Web, plan sponsors can view or update participant information, initiate disbursement requests and verify disbursement history online with the same functions and edits as the Omni Payments transaction.

Sponsor Payments Web also streamlines the report distribution process. The most common customer reports can be requested, routed and scheduled for delivery through Sponsor Payments Web. Once the report request is submitted, reports are processed in the very next cycle and available through the Sponsor Payments Web for viewing or downloading. With Sponsor Payments Web, total benefit distribution connectivity is achieved from the workstation to the Web server to the host. Regardless of delivery method, a plan sponsor only needs a user ID, password and Web access for fast and convenient plan information. Sponsor Payments Web helps you access your account information from anywhere at any time.

HIGHLIGHTED FEATURES
