

RETIREMENT FORECASTER:

SunGard's Omni Retirement Forecaster is a retirement planning program that gives users access to account balances from the defined contribution system, allowing them to project future values of accounts and benefit amounts. This program provides projections based on a host of user-defined variables, such as interest rates, inflation rates and mortality factors. With Retirement Forecaster, your employees can have the information they need for planning their retirement.

- Provides employers with the ability to browse forecast records online
- Helps determine the amount of additional contributions required to purchase an annuity at a future date
- Provides the ability to vary future contributions
- Determines projected benefit value based on the earnings rate and/or inflation rate
- Calculates various annuity payout options using the projected account balance
- Provides high and low projections
- Generates reports indicating the options available to beneficiaries of fixed-period and period-certain annuities
- Allows access to forecast records through Omni Scripting
