

## E-PROCUREMENT

The e-Procurement module is an automated, full-service, end-to-end e-procurement solution.

### Web Requisitioning

- Eliminate paperwork and reduce errors.
- Easy setup.
- Interface is simple to use and intuitive.
- Full integration with aggregated vendor catalogs and IFAS purchasing.

### Aggregated Vendor Catalogs and eCommerce

- Search and compare customized pricing.
- View catalogs of local, regional, and national vendors in one place.
- Deliver Purchase Orders electronically via the Internet.

### IFAS Integration

- Automatically create a purchase request in IFAS from an approved requisition.
- e-Procurement creates (pre)encumbrance and performs budget-checking function.
